ANNUAL EXAMS

Your medical office visit today is for your annual well woman exam. This appointment includes a pelvic exam, breast exam, and a Pap smear specimen if required. Your appointment has been scheduled in a time slot for a well woman exam only.

If you are having any other problems or issues at this time it will require more time to discuss and evaluate. You can let your medical provider know you are having these issues and a follow up appointment will be scheduled for you to discuss them.

***Please note:** If you do have other issues that are addressed at today's visit, your insurance will be billed for an office visit related to this current problem and a well woman annual exam. For a problem visit, most insurance companies require you to pay a co pay or apply the charge to your deductible which will be your responsibility.
